

NUTTAPORN ROBKOBO (ANN)

Phone: (+66) 95 980 3051 | Email: nuttaporn.robkob@gmail.com

PROFILE SUMMARY

I am Mechatronics Engineering graduate with hands-on experience in engineering, software, robotics, automation, and data-related projects. Experienced in developing practical solutions through programming, system integration, testing, and troubleshooting. Strong analytical and problem-solving skills, with a passion for learning, experimenting with new technologies, and turning ideas into working solutions.

EDUCATION

Rajamangala University of Technology Lanna 2022 - 2026

Bachelor of Engineering

- Major in Mechatronics Engineering
- Thesis on "Magnetic Field Simulation System by Octagonal Helmholtz Coil"
- GPAX : 3.26

WORK EXPERIENCE

National Astronomical Research Institute of Thailand (NARIT) May 2025 - Sep 2025

Internship at International Moon Research Station (ILRS)

- Designed and assembled a 3-axis Octagonal Helmholtz Coil system.
- Assisted in mechanical design and system integration.
- Performed engineering simulations using MATLAB/Simulink.
- Conducted system testing, troubleshooting, and validation.
- Prepared technical documentation and collaborated with researchers.
- Supported prototype development and engineering improvements.

ADDITIONAL INFORMATION

Technical Skills

- Programming: Python, C, C++
- AI & APIs: LLM APIs, Google Gemini API, Speech Recognition, API Integration
- Web & Application: Streamlit, HTML/CSS
- Database: SQLite, SQL
- Engineering: MATLAB/Simulink, Embedded Systems, Arduino
- Tools: SOLIDWORKS, Microsoft Office

Core Competencies

- Analytical Thinking
- Technical Problem Solving
- Attention to Detail
- Communication
- Team Collaboration
- Adaptability
- Continuous Learning

PROJECT EXPERIENCE

Load Cell-Based Weight Scale

- Developed an Arduino-based weight measurement and sorting system using a load cell.
- Programmed the control logic for automatic object sorting with a servo motor.
- Integrated hardware components and tested system performance.

Servo-Controlled 4WD Mecanum Robot

- Diagnosed hardware and system issues involving power limitations, sensor calibration, and servo torque constraints.
- Conducted testing and troubleshooting to improve system performance and reliability.
- Achieved the target of sorting four ball colors within a three-minute time constraint.

CERTIFICATIONS

- Completed the training program of Basic PLC (GX Works2) by Mitsubishi
- Completed the online course "The First Step of Innovation" by the National Innovation Agency

LANGUAGES

- Thai – Native
- English – Basic Working Proficiency
